

## NOTIFICATION APPLIANCE CIRCUITS

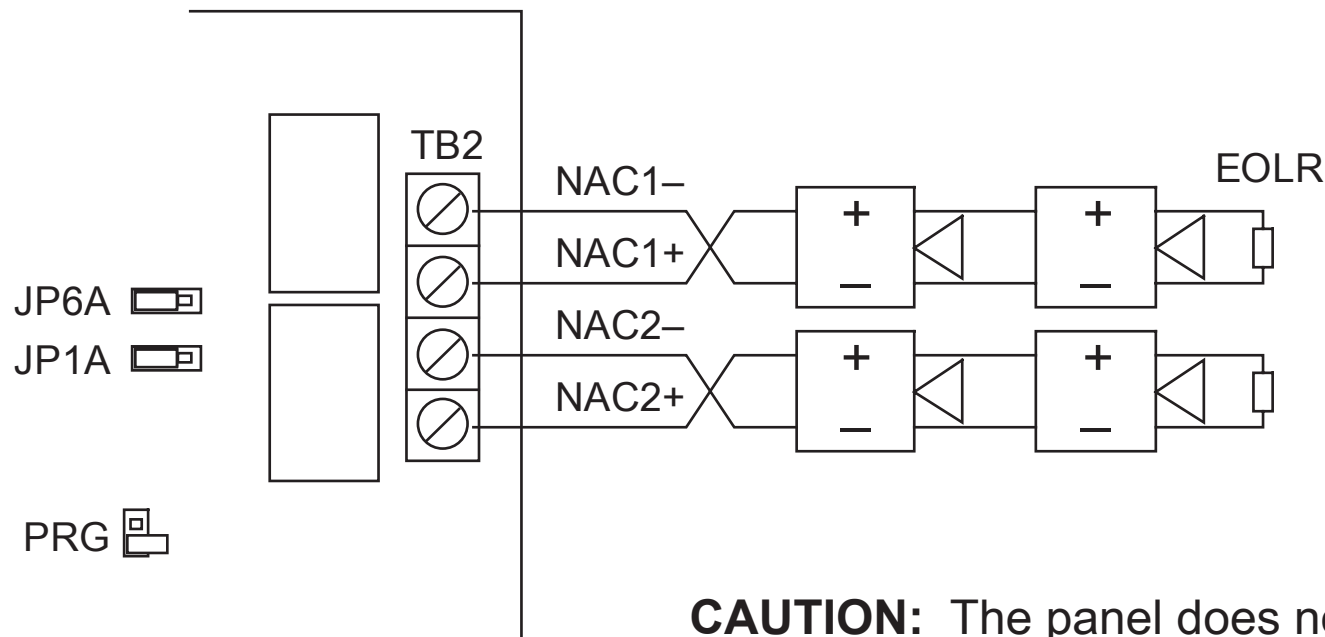

Class B (Style Y) Wiring

Operating Voltage: 24V FWR

Operating Current: 1.5A / circuit, 2.5A total

Circuit Impedance: 13 ohms, 0.03 microF max

EOLR: 4.7Kohms, 1/2W (P/N EOL4.7)

**CAUTION:** The panel does not indicate when JP6A is missing. A shorted NAC circuit may damage the equipment if NAC jumpers are missing or set incorrectly.

**CAUTION:** Break the wire run at each field device to provide proper connection supervision. Do NOT loop wires under terminals.
